

HYDRAULICS

Maximum Uptime, Minimal Footprint.

DGP biodegradable hydraulic fluid is a premium bio synthetic formulation created to withstand the most demanding and harsh conditions. It is not “Veggie” oil which has been used for decades to replace petroleum (unsuccessfully) in environment sensitive applications. Veggie oils, although safe, are not compatible with petroleum, they will break down under extreme pressure/temperature very quickly and often times create insoluble gums or sludge. DGP is compatible with petroleum, there are no SOP changes to pumps, seals, lines or tanks, and it will outperform conventional hydraulic oils that adhere to the ISO 15380 standard.

SPECIFICATIONS

- Bio Synthetic ISO 22-32-46-68
- Long Interval High Efficiency
- Dielectric Safety Rated >36kV
- OEM Tested and Approved

PERFORMANCE

- Eaton E-FDGN-TB002-E
- ASTM D6158 HVHP
- ISO 15380 HEPR
- Danfoss 520L0463
- Parker Hannifin HF-0 (-1, -2)
- Parker Hannifin HF -6 HEPR
- Bosch Rexroth RE 90220
- DIN 51524-3 HVLP

SUSTAINABILITY

- USDA Certified Biobased Product
- EPA Vessel General Permit Qualified
- Environmentally Acceptable Lubricant (EPA)
- Certified Biodegradable

SKU ISO SIZE

SKU	ISO	SIZE
1041	ISO 22	DRUM
1051	ISO 32	DRUM
1061	ISO 46	DRUM
1071	ISO 68	DRUM
